

RAPID BLOOD TYPE DETERMINATION

New Technology - New Products - New Choices

For years, you've depended on the original and only card test for blood type determinations. RapidVet[®]-H IC gives you another choice.

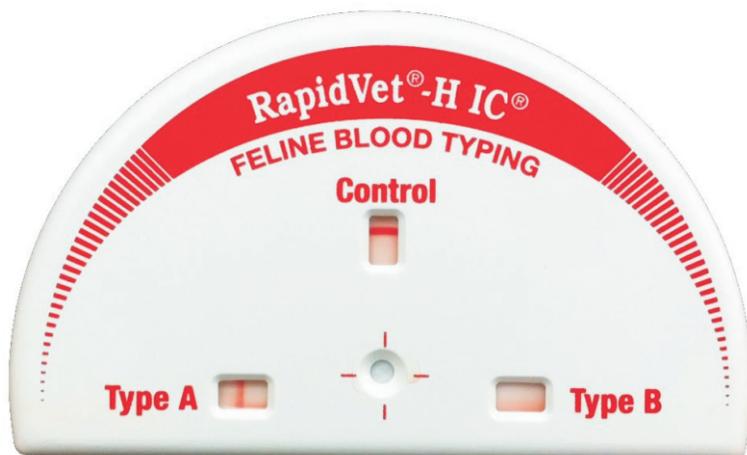

Immuno-chromatographic (lateral flow) test for blood type determination in minutes even in cases of auto-agglutination, low PCV or hemolysis.

Easiest to read IC test available with result lines clearly displayed against a white background.

Clean, Easy, Economical . . . Vital.
